PROFILE

Backend-first engineer with **2+ years of continuous production delivery** across marketplaces, healthcare retail, OTT, and government portals. Sole backend owner on systems serving **1,000–10,000 active users**. Founder of **Nexavio**, running end-to-end delivery — architecture, Linux infrastructure, GitLab CI/CD — for 15+ shipped platforms. **LPIC-1 certified**.

EXPERIENCE

- Backend Developer & Product Owner** Jul 2024 — Present
Hominex — Mashhad, Iran · Real-estate / automation platform
 - Sole backend owner on a 3–5 person team, designing and maintaining a system actively serving **1,000–10,000 users** across multiple cities.
 - Architected a property-listing database from the ground up (geolocation, multi-type inventory, transaction history) on **MySQL & PostgreSQL**.
 - Built a multi-driver authentication module (**JWT + session + OTP**) shipped as a reusable Laravel package, cutting auth setup time on future projects.
 - Own sprint backlog, cross-team coordination with frontend/mobile, and release deployments on Linux servers with Docker.
- Founder & Technical Lead** Jan 2025 — Present
Nexavio — Fars Province, Iran · Software development company
 - Founded and operate Nexavio; own product architecture, client delivery, deployment infrastructure, and technical direction across all independent client engagements.
 - Established repeatable delivery standards: clean Laravel architecture, containerized Linux deployments, and GitLab CI/CD pipelines for reliable releases.
- Full Stack Developer** Nov 2024 — Present
Bazargani Ahmadian — Kazerun, Iran · Trading company
 - Built a full trade management system covering inventory, procurement, sales workflows, and third-party API integrations (shipping, invoicing).
 - Delivered a real-time reporting dashboard for management; independently handled server setup, GitLab CI/CD, and production deployment.
- Laravel Backend Developer · Livewire & Portal Dev.** Mar 2024 — Present
Klasino, Aeeen Gostar Parnian Dade & Islamic Azad University — Shiraz / Kazerun, Iran
 - Own backend development across **two concurrent SaaS products** (Klasino), an internal TALL-stack management portal with role-based access control, and portal integration work for one of Iran's largest higher-education networks.

SELECTED INDEPENDENT PROJECTS

Mother Pharmacy

Online pharmacy — inventory-backed ordering & REST API.

Moviesho

OTT streaming backend — catalog & platform-scale API.

Sazkala

B2B marketplace — vendor/product management, transactions.
